

ENERGY AND ENVIRONMENT COMMITTEE REPORT relative to the Electric Vehicle (EV) Masterplan regarding the feasibility of prioritizing EV charging rebate applications for multifamily dwelling units that are located in disadvantaged communities, and related matters.

Recommendation for Council action, pursuant to Motion (Krekorian – Yaroslavsky):

REQUEST the Los Angeles Department of Water and Power (LADWP) to:

- a. Report within 90 days or at their next EV Masterplan report to the Energy and Environment Committee, whichever is sooner, regarding the feasibility of prioritizing EV charging rebate applications for multifamily dwelling units that are located in disadvantaged communities, or that are in buildings with greater than 20 percent affordable housing units. The report should also evaluate the viability of creating separate funding pools for multifamily applicants versus other "commercial" customers.
- b. Report within 90 days on a potential plan to increase its annual funding authorization for EV charging rebate programs to better align with recently adopted and more aggressive EV and charging infrastructure goals in the EV Masterplan.
- c. Implement a customer reimbursement timeline not to exceed 120 days from completed application submittal, under any current and future EV charging incentive programs.
