Comments for Public Posting: I commute by bike with my children everyday to drop them off. I would love to have the assurance that drivers are aware that they share the road with many modalities especially pedestrians. This is low hanging fruit and long overdue for a city that claims to have livable public space. If we protect the most vulnerable Angelenos children and the elderly we'll make progress. Drivers too often forget that they are also pedestrians at times. Let's make this common sense legislation something everyone can get behind. Who doesn't want a more accessible and safer environment for all?
