Comments for Public Posting: Please support this motion. So many of us are priced out of traditional rental housing and then a vehicle becomes the next logical, safe choice. It turns into a longer-term solution due to extreme lack of low-income housing in Los Angeles. The continued passing of the Oversized Vehicle Ordinance only moves vehicles around, creates excessive parking tickets, and hardship. Los Angeles does not have a system of repairs, adequate safe parking or low-income housing solutions for the vehicle housed population. After receiving parking tickets, which many vehicle housed people can't afford to pay and most need assistance using the CAPP program. This assistance isn't provided by the continuum of care social services. We need to address this more humanely.
