Comments for Public Posting: I am against the L.A Zoo's Revised Vision Plan, as it is unnecessary, harmful and costly. Griffith Park serves as the habitat for a variety of plants and wildlife that will be harmed during this development process. For instance, the proposed California Visitor Center will destroy the natural topography, affecting wildlife, plants, water travel - there is NO reason to do this. There are also protected trees and shrubs within this space. Following through with these plans will negatively affect the local ecology.

Comments for Public Posting: I am very against against the visitor development in Griffith Park. We need to preserve the natural habit. This is a park. It does not need more development. The animals that are in the area are very sensitive to light. This would be very harmful to their habitat. The walnut trees are so precious and should not be removed they are protected by county laws.the one thing we did not need is development inside our most important open park. We have enough development and this is one area that needs to stay in its natural state. Please do not cut down more tress. Our planet is already in peril we should do all we can to preserve our little green space that we have.

Comments for Public Posting: I oppose this development. Even a small amount of human activity will affect wildlife. Please preserve the few wild spaces that exist in the city. Griffith Park is a treasure. There are already several high traffic areas in the park. We do not need more.

Comments for Public Posting: I oppose the LA Zoo expansion. Animals are very important but so is our beautiful land. We must protect both.

Comments for Public Posting: I oppose this expansion as planned. Please find other ways to improve the zoo without digging more into the surrounding areas.

Comments for Public Posting: I am 100 percent against the proposed LA Zoo expansion proposal. Griffith Park wildlife has precious little space as it is and doesn't deserve more incursion by human development of any kind. The LA Zoo wanting to bulldoze 16 acres of native habitat is anathema to the conservation and protection it says it champions. If this project goes forward I will no longer renew my annual family membership to the LA Zoo.

Comments for Public Posting: To City Council, These wild animals are always the ones who keep losing their rights. For one thing close the borders when you keep letting in billions of ILLEGALS and millions of legal immigrants, the US is getting so overpopulated and these greedy politicians and developers keep taking and taking land away from these animals. We are full no more room for anyone pouring into the country. That is also taking habitats away from these wild animals. We humans have moved into their homes and are still doing so. STOP THE DESTRUCTION OF WILDLIFE HABITATS. Humans are the most selfish, greedy ignorant beings on the planet. This planet is not all about humans, so stop allowing construction of more commercialized and housing developments to build in these wildlife habitats. These wild animals are losing their homes places to live. And then you have these complainers who complain there is a bear or a mountain lion in their yard This is a NO VOTE FOR ME. When you destroy WILDLIFE HABITATS they are gone forever. Why are we even having to defend this land, keep that land for the wild animals. My gosh so fed up with these greedy humans. California wildlife already are struggling to survive and have barely anywhere to eat anymore due to human development. Mrs..Walker

Comments for Public Posting: I deeply oppose LA Zoo's revised vision plan Alternative 1.5. This plan would violate everything Griffith Park desperately strives to protect.
