**Comments for Public Posting:** I support a NO vote on this Motion. I would urge the "mover" of this Motion to take a look around at the City of L.A. In the event she/he/it has not, the City looks like a 3rd World Country. Homeowners/residents/taxpayers are sick and tired of being sick and tired of the street(s) where we reside being negatively impacted by oversize vehicles/RVs, some of which are and should be deemed inhabitable for health reasons, alone. We taxpayers are also sick and tired of being sick and tired of having to live in conditions not of our choosing. Take a look---taxpayers are "fleeing" L.A. because our rights on this issue (and other such) are being ignored. The prohibition on oversize vehicles should be strengthened to protect the quality of life of those of us having to live under what is becoming an "attack" on our ever-eroding rights to a good quality of life. I "Move" that the street(s) the Mover/Seconder of the Motion reside on is/are designated to locate these vehicles. What is being proposed is not the answer. In the event you have not noticed, there is a voter BACKLASH to nonsense such as this; and it is growing. Please take notice! In addition, many of these vehicles are locating in areas posing dangerous visibility issues for others. Have you taken that into consideration as you rush into attempting to take away what little protections we have left? {rhetorical question}
