Comments for Public Posting: This plan is wildly unpopular. The vast majority opposes this plan and the EIR includes multiple letters from scientists, ecologists, nonprofits, and even state agencies - CA Dept of Fish & Wildlife that are against it. How can we have faith in our leaders if you do not care about our opinions and the opinions of scientists? Why support blowing up a hillside in wildlands, and destroying endangered native trees? Do you not have any respect for indigenous lands and the power of trees that took decades to grow and house plant and animal life in our community? Creating an attraction for tourists centered around caged animals, is that the city's goal for the Olympics, while native plants and animals die? This was the home for P-22. This city is such a joke in passing measures in the face of significant public opposition. You don't care what the people think you just act like autocratic leaders. This isn't democracy. Fascists. This is imperialism, colonial mindsets. Just destroying lands to create more space to display some conquest as a result of the destruction. I'm so disappointed in Eunisses for passing this. And very disappointed in Raman for not caring about the environment.
