Comments for Public Posting: Basic improvements take far too long to implement in LA despite all our good intentions. Bike lanes, crosswalks, and bus lanes are relatively cheap and technically simple to implement, and people are injured or die on our streets while worthy and cost-effective projects languish amid administrative delays. Please support this motion to dramatically speed up critical transportation infrastructure projects.

Comments for Public Posting: We need to URGENTLY improve the conditions for non-drivers in our city and need to quickly and dramatically implement pedestrian safety improvements as well as bike and bus infrastructure. If you build this type of infrastructure it will be used, but it must be built first, and done well, to bring people to these modes of transpiration that we desperately need people using!
