Comments for Public Posting: I agree we definitely need to address the atrocities brought upon protestors during the civil unrest followed by the public lynching of George Floyd. We received extreme police brutality at an anti-police brutality rally and now we are having the police who beat us investigate themselves?! Sending a pig in to investigate a pig pen is just a mockery of the entire community. Who will be double checking their work? I just want to make sure the following activities are recorded since they are widely spread and on video and we know they keep denying these truths. We know we can't trust the chief, sheriff, or anyone in the department so who can we trust for this information besides ourselves? -Finger banging women the dept arrested while patting them down and refusing to provide female officers. We know there is a female officer deficit despite the promise decades ago to hire more female officers. -The busses. Protestors were arrested and stuck in cages on buses. Multiple people including women of all ages were slammed into cages on buses during a global pandemic, keeping them in the cages for hours, blaring heavy metal music to physiologically damage them, ignoring their pleas for help, and then releasing them with no explanation hours from where they were picked up in the middle of the night. As they cut off their zip ties they sliced multiple wrists open and didn't give a shit. -The hit and runs. Just yesterday the LAPD posted about some community hit and run but has yet to discuss the hit and run we all saw on TV. In broad daylight an LAPD officer drove their car into protestors on purpose and then drove away. -Every single shot to the face. Multiple people have lost their eyes, their sight, and have lasting damage due to officers shooting people in the face on purpose. These same officers used gas canisters as bullets and chose to shoot these canisters directly at the heads of protesters.
