**Comments for Public Posting:** Not only does there need to be an overall change in reallocating tasks and responsibilities currently held by the police that they are not and cannot feasibly be trained or equipped for, there needs to be a sustainable system of alternatives to policing when it comes to mental health incidents, welfare checks, etc. This/these program/programs need to be implemented immediately and all across of Los Angeles as lives that have been stolen by law enforcement, especially when it comes to low income and/or BIPOC individuals, have only continued to increase at a horrific pace. Please don't settle for a pilot program and commit to widespread alternatives to policing (that includes defunding and reallocating funds from law enforcement to these services) right now.
