EXHIBITS:

Power Point slides regarding the proposed Bird Street changes presented by staff at the hearing and printed for the File, collectively labeled Exhibit 1.

SUMMARY:

Dina Elkinawy presented proposed revisions to the Bird Street conditions already implemented in the haul routes previously approved in the CD 4 “Bird Streets” area of the City. She presented a chart showing how implementing two major routes out of the Bird Streets area will reduce the amount of time it will take to complete all of the proposed hauling in the area.

Emma Howard, representing CD4, stated that Councilman Ryu’s Office is trying to work with the residents in the Bird Streets area. She stated that the two routes hauling at the same time is a better way, however, she would like to explore the capping provisions with staff and the constituents.

Approximately 14 concerned neighbors expressed reservations with using the two routes at the same time because it will double the amount of hauling trucks in the area that are already hauling.

Jamie Hall stated that doubling the amount of trucks hauling in the area is considered an environmental impact and that another CEQA analysis would be required.

Jason Somers, Tony Russo, and Ed Goldberg, were in support of the two proposed routes hauling at the same time, with 24 truck trips each.

AGAINST: None

MOTION PASSED

FINDINGS (Adopted):

1. The request is not a slight modification of the Code inasmuch as an extension of time would allow a continued unapproved use of the lot.
2. The request is not within the spirit and intent of the Code inasmuch as this use does not conform to the Building or Zoning Code Standards.
3. It is not impractical for the petitioner to adhere to the strict requirements of the code given that the items are mobile and could be relocated to an approved location.
